Great of Lecky - lower end of Hutton-Abber
 The group of hand held early electrostatic apparatus
 recovered from the Hutton-Abber site
 The objects are glass, brass, silver, iron
 and wood and the Concordia Electric Spring Lamp

In the unlikely event ...
 Reinscription apparatus. The device apparatus
 invented by J.H. Savary around 1797.
 The apparatus is entitled "Description of the
 use of the Apparatus for the relief of
 rheumatism". It also carries some
 notes on the use of the apparatus
 being intended for the relief of
 rheumatism and convulsions of
 the body.
